SUMMARY

I'm a Senior Software Developer, with over 11+ years of experience in Applications Design, Development, Team Management and expertise in skills like JavaScript, NodeJs, ReactJs, PHP, Laravel, Redis, AWS and Docker. I help build an effective web presence and user experience to help grow their brand aligned with the company's business proposition.

PROJECTS

Vision

Vision is a University management system including a student registration & Attendance system. This Application has multiple microservices to build. To manage API Get Way, I have created one Nodejs microservices.

Technologies: NodeJs, React, MongoDB, AWS

Kalibra

This Application helps people take intentional steps toward optimal health. As a base framework, I have used express. For authentication, I have used jsonwebtoken. Validatorjs for input validation. Multer for file upload.

Technologies: NodeJs, React, MongoDB, SSR, AWS Cognito

Shiksha Bandhu

Shiksha Bandhu's key purpose is to bring children to light and to guide them to their complete growth. As a base framework, I have used express. I have used sequelize ORM. I also did Razorpay integration.

Technologies: NodeJs, React, React Native, MySQL

SKILLS

Primary:

JavaScript, NodeJs,
MongoDB, Mysql, Postgres

Secondary:

ReactJs, PHP, Laravel,
Codeigniter, Redis, AWS,
Docker

EDUCATION

HS

NRCA, Hooghly

2006

I have finished my V to HS
from NRCA.

e-DAST

CMC, Kolkata

Nov 2007 - Nov 2010

I have done 3 years of
e-Diploma in Advanced
Software Technology.

PHP

NIST, Kolkata

Nov 2010 - Jan 2011

I have done Advance PHP
training from NIST Garia.

QuickBooks Connector (Online/Desktop)

QuickBooks Connector is a microservice for syncing data between TracktraceRx and QuickBooks. As a base framework, I have used express. For authentication, I have used jsonwebtoken. For multi-language I have used i18n. I have worked on this project for 1 year and 4 months. We have 3 members in this project.

Technologies: Nodejs, React, MongoDB

ANVISA

It is a microservice that will enable software to run businesses in Brazil as per Brazil government requirements. Along with tracktrace, I have worked on this project for 7 months. We have 3 members in this project.

Technologies: NodeJs, React, MongoDB

TracktraceRx

TracktraceRx is a supply chain, logistics, and operations for manufacturers, distributors, wholesalers, or growing small businesses. As a base framework I have used express. For authentication I have used jsonwebtoken. For multi language I have used i18n. For data export I also used fast-csv. I have worked in this project 2 years 3 month. We have 16 members in this project.

Technologies: PHP, NodeJs, React, Redis, Docker, ELK Stack, PostgreSQL, Neo4J

DayInterpreting

DayInterpreting is a Phone Interpreter on Demand to Connect You with the World. It is an on-demand, real-time, OPI solution from Day Translations.

Technologies: CodeIgniter, JavaScript, Twilio, PostgreSQL

Nepal Bhutan Import & Export

We have created an application for Kolkata port to import & export goods from Nepal & Bhutan.

Technologies: PHP, JavaScript, MySQL

LANGUAGES

Bengali, English, Hindi

ONLINE CERTIFICATES

Front End Development Libraries

300 hours of coursework.

By freeCodeCamp.org

JavaScript Algorithms and Data Structures

300 hours of coursework.

By freeCodeCamp.org

PROFICIENCY

- * Communicate Clearly and Effectively.
- * Analytical and Decision-Making Skills.
- * Work in a Pressurized situation.
- * Enthusiast in New ideas and Work.
